

RAISING A GENERATION THAT'S NOT AFRAID OF THE DENTIST

Solea® is a breakthrough laser technology that delivers a completely different experience for both you and your patients. It's fast, precise, and anesthesia-free for hard tissue procedures, and blood-free, suture-free, and pain-free for soft tissue procedures. Solea helps eliminate three major fears children have when going to the dentist – noise, needle, and numbness. Children and parents love the experience and so will you.

BETTER FOR PATIENTS BETTER FOR YOU

- No needle, no waiting, no fear. Sit down and get to work. Your patients will barely know you started by the time you're done.
- Without anesthesia, your patients are more at ease, you do multi-quadrant dentistry and get more done in a single visit.
- Everything from restorations to pulpotomies to stainless steel crowns can be done anesthesia-free, virtually 100% of the time.
- Soft tissue procedures from frenectomies to tooth uncoveries and treating hyperplastic tissue are all within your reach. "All-tissue" means all-tissue with Solea.
- Parents love Solea because their children feel better without needles, drills, and numbness. Kids don't leave with a numb cheek or lip. They can go back to school and parents go back to work. Everyone makes fewer trips to the dentist when more gets done in one visit.
- Happy patients make happy parents and happy parents make referrals. You'll love the new patient flow enabled by Solea.
